

AC1200 Wireless Dual Band Router

Model: AC10

// Highlights

- Enhanced Signal – High gain antennas dramatically increase the strength and stability of the wireless signal
- Fast Wireless Speed - Ideal for HD streaming, online gaming, and large file downloads
- Easy Installation - Intuitive webpage guides you through the setup process in minutes
- Multi-Mode - Access Point Mode, Range Extender Mode, and Router Mode supported to satisfy all application scenarios

// Applications

Ideal for large homes with multiple rooms and multiple users

Ideal for average Internet users seeking fast downloads, seamless streaming audio, uninterrupted streaming video, and lag-free online gaming

// Features

Ease of Use

The simple three-step setup allows you to complete installation in minutes

Parental Controls

Establish appropriate policies to protect children with responsible, safe internet access

IPTV Supported

Supports IGMP Proxy/Snooping, Bridge, and Tag VLAN to optimize IPTV streaming

Guest Network

Provides a separate network for guests to ensure your security and privacy

Quality of Service

Prioritizes devices you select to perform better

IPv6 Supported

Allows you to enjoy IPv6 services provided by your ISP and visit IPv6 websites

// Broader Wi-Fi Coverage

Four powerful high-gain antennas cast Wi-Fi signals to every corner of your home. Beamforming detects your connected devices and concentrates wireless signal strength towards them, making your connections more stable.†

// MU-MIMO Technology

With MU-MIMO, AC10 communicates with multiple devices at the same time to allow connected devices to achieve faster speeds than standard AC routers, increasing overall network throughput.‡

// High Speed Dual-Band Wi-Fi for Lag-free Work and Entertainment

With the powerful 802.11ac technology, the AC10 lets your PC or smartphone enjoy 3X faster connections than 802.11n. Combining 300 Mbps 2.4 GHz (perfect for surfing and emailing) and 867 Mbps 5 GHz (ideal for HD streaming and gaming), you have the flexibility to allocate your devices to dedicated networks to do more at the same time.

† Maximum wireless signal rates are the physical rates derived from IEEE Standard 802.11 specifications. Actual wireless data throughput and wireless coverage, and number of connected devices are not guaranteed and will vary as a result of network conditions, client limitations, and environmental factors, including building materials, obstacles, volume and density of traffic, and client location.

‡ Use of MU-MIMO requires clients to also support MU-MIMO.
