

Good Quality Soft Adhesive with High Elastic

✓ Soft Adhesive with High Elastic
High wear resistance,aging resistance

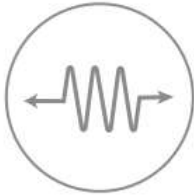

✓ chemical resistance
and environmental
resistance

✓ waterproof and
moistureproof,keep
warm and defend cold,
UV resistance

✓ environmental
protection

CR-TPU 3D printer filament

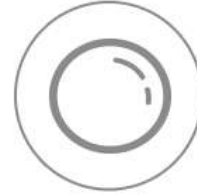

High Resilience

Soft Adhesive material

Environmental Protection

Good Glossiness

Chemical Resistance

Wear Resistance and Aging Resistance

Keep Warm and Defend Cold

UV resistance

CR-TPU 3D printer filament

High Resilience, Good Glossiness

Soft and elastic, full of toughness, with good glossiness full of elastic.

CR-TPU 3D printer filament

High Wear Resistance And Aging Resistance

The printing model is resistant to wear and scratch, with good aging resistance.

CR-TPU 3D printer filament

Good Chemical Performance, Environmental Protection And Nontoxic

Excellent chemical resistance (water resistance, oil resistance, solvent resistance) and environmental resistance, environmental protection and nontoxic.

CR-TPU 3D printer filament

Multiple Colors Gives You A Colorful World

There are 10 common colors, which is always one for you!

Black

White

Gray

Blue

Yellow

Green

Pink

Red

CR-TPU 3D printer filament

Simple Operation, Good Compatibility

CR-TPU is compatible with all FDM printers of creality 3D, and you can create your artwork with this filament of high quality in just a few simple steps.

Product Parameters

Product Name: CR-TPU 3D printer filament N.W. : 1kg

Printing Temperature: 210—240°C

Diameter Package weight: 1.15kg

Bubble: No

Package size: 210*210*75mm

Filament Diameter: 1.75mm

Tolerance: ± 0.03 mm

Color: Black, White, Gray, Red, Yellow, Green, Blue, Pink,
