Compatibility with Windows/macOS/Android.

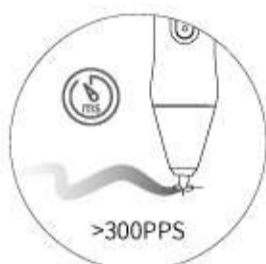

RTS-300 & RTM-500 & RTP-700 Pen Tablets

Unleash Your Creativity with the Handy Drawing Tools

Enjoy Efficiency & Comfort

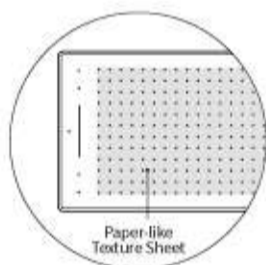

Exceptional Report Rate of >300PPS

To meet the needs of more customers, the report rate is increased to above 300PPS for the first time, which ensures prompt feedback of every pen movement and smooth lines input without any lagging.

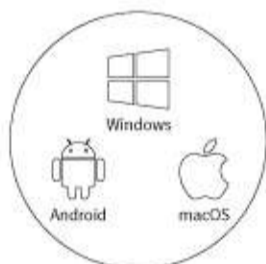

Organic Lines Reproduced by the New Digital Pen

The new generation battery-free digital pen PW400 is equipped with thinner and more durable pen nib. Together with 8192 levels of pressure sensitivity, it not only offers user a more stable and comfortable drawing experience but also ensures lines to be rendered authentically and naturally.

Paper-like Drawing Experience

Thanks to the special surface finishing, drawing on these pen tablets feels like drawing on paper where you can feel the friction between the surface and the pen nib. Besides, the dots on the texture sheet not only help to define the working area but also make the drawing more intuitive.

Strong Compatibility and Connectivity

Compatible with Windows, macOS, and Android, these pen tablets can work together with computers, tablets, and phones.
